

Profile of company Ingema s.r.o.

Company Ingema s.r.o. has been active on domestic and foreign markets since 1994. It was established as a company with a focus on providing complete professional services in the sale of products, specifically tiles, sanitary ware, fixtures and installation material, with the goal of providing emerging markets a wide range of products in a period where market lacked these products. Integral part of our activity is construction activities, where the company was involved and continually engages in many projects throughout Slovakia. In order to improve our services to provide and satisfy our customers' every need and demand, the company developed in national and international transport. From the very beginning of its existence the company focused mainly on obtaining high-quality business intelligence and building partnerships with stable and technologically adept companies. Thanks to tens of thousands of suppliers and customers within the EU sharing the goal of building the most efficient business environment, Ingema s.r.o. received the Diamond Award Slovak business for its efforts in 2009.

The percentually highest portion of business activities comprises of sale of wall and floor tiles, which we deliver to the Slovak market directly from manufacturers in Germany, Spain, Poland and Italy. This category consists of ceramic, earthenware, gres porcelain stoneware, concrete and tiles of natural stone. Our secondary line of goods offered by our company includes sanitary ware. We actively work with the German company Villeroy & Boch, which is a global leader in the production of the highest quality sanitary ware. Patented surface treatment method, elegant design and top quality make this sanitary ceramic unique on the market. Inherent part of any bathroom are the fixtures. Range of superior quality fixtures are represented by companies such as Grohe, Hansgrohe, Hansgrohe Axor, Kludi and Faris. Ingema s.r.o. offers complete solutions for water, gas and heating systems. In this area, guaranteed quality products are offered from manufacturers such as Viessmann, Junkers, Buderus, Giacomini, Wavin. We have not forgotten the drainage system solutions for buildings, where we offer the best products from company ACO. Exterior around each building are inherently driveways, sidewalks, and various decorative elements which we obtain from manufacturers Semmelrock and Bruk - Bet. Wide range of our products offered are complemented by various construction materials such as adhesives, jointing materials, waterproofing coating, penetrating sealers and cleaning products for maintenance and upkeep of tiles, floor tiles and sanitary ware.

Logistic center of our company provides comprehensive services from the beginning of the process in ordering goods from our international suppliers all the way to delivering goods to end-users. It's a given fact that conversation takes place is in English, German and Polish along with multi-lingual issuing of all documents such as delivery notes, invoices and all necessary documents for business communication.
